

HISTORIC HOUSES TRUST OF NEW SOUTH WALES

OCCUPATIONAL HEALTH AND SAFETY POLICY

The Historic Houses Trust of New South Wales is committed to providing a safe and healthy environment for staff and visitors at all its properties.

Where due to pre-existing conditions and the requirements of conservation and presentation, hazards are present, the HHT will ensure that suitable training, supervision, and allocation of resources and information is provided to reduce the risk to staff and visitors.

The HHT will implement positive programs to ensure that accidents are minimised, reported and investigated and that all hazards are controlled. All staff will receive the necessary training to work safely and to participate in organised safety programs. This will be achieved through cooperation between employees and management at all levels as defined in the HHT Occupational Health & Safety Procedures Manual.
